16.2 The Licensee shall not be entitled to use the Hardware for any other purpose than as set out in the relevant specifications and in combination with the Licensed Products.

17. TERMINATION OF THE AGREEMENT

17.1 IAR shall have the right to terminate this Agreement with immediate effect if the Licensee is in breach of any of its obligations under this Agreement, including, but not limited to (a) use of the Licensed Product in any manner other than pursuant to the rights granted in Sections 3 and 4; (b) breach of the confidentiality provisions of Section 8; (c) failure of the Licensee to remit payments as set out in the Contract; or (d) Licensee's breach of export control regulations as set forth in Section 18.

17.2 This Agreement will terminate immediately without notice if the Licensee suspends its payments, becomes bankrupt or insolvent or enters into liquidation or otherwise can be regarded as insolvent.

17.3 Upon termination or expiry of this Agreement, the License Term will be terminated and the Subscription and the rights granted to Licensee hereunder shall be terminated. Consequently, upon such termination or expiry of the Agreement, Licensee shall have no further right to use the Licensed Products. Notwithstanding the foregoing, upon expiry or termination of the Agreement and/or the Subscription, the Licensee may continue to use binary images that contains Software Source Code provided by IAR which are produced during the Subscription, for an indefinite period.

17.4 Additionally, in the event of IAR's termination of this Agreement pursuant to Sections 17.1 or 17.2, IAR may, at its option, and in addition to any other rights hereunder, and in addition to any other remedies available to IAR under the law, in writing require the Licensee to uninstall, return or destroy all versions

of the Licensed Product and the Documentation and any and all documentation relating thereto on any media and in any form in Licensee's possession. Licensee shall give a written confirmation to IAR that all material related to the Licensed Product and its operation has been uninstalled, returned to IAR or destroyed. The provisions of Section 17.3 shall survive the expiry, cancellation or termination of this Agreement.

18. EXPORT CONTROL REGULATIONS

- 18.1 The Licensed Product and the Documentation are subject to export or import regulations in various countries, including but not limited to the regulations of the United States Export Administration Act and EU Regulation 2021/821 ("**Regulations**"). The Licensee hereby agrees that the Licensee will not knowingly (a) export or reexport, directly or indirectly, any product or technical data, or any Licensed Product that is restricted by applicable national regulations, including Hardware and software ("**Controlled Product**"), received from IAR or IAR Distributor under this Agreement, (b) disclose such technical data for use in; or (c) export or reexport, directly or indirectly, any direct product of such technical data or of such other Controlled Products, including software, to any destination to which such export or reexport is restricted or prohibited by U.S., the European Union, the United Nations, or other applicable law, without obtaining prior written consent of IAR; nor (d) export or re-export any products, including software, received from IAR or IAR Distributor to anyone for the development or production of nuclear, chemical or biological weapons.
- 18.2 For those Controlled Products that require an export license, it is necessary to have an approved export license prior to any of the following activities related to such Controlled Products: (i) IAR granting access to the Controlled Product; (ii) IAR providing Support and Update Services on such Controlled Product; and (iii) when relevant, prior to shipping the Controlled Product to the Licensee. The Licensee shall provide all relevant and necessary documents to IAR or IAR Distributor in order for IAR apply for the necessary export license. IAR shall not be held liable under this Agreement and/or Contract in the event such an application is delayed or rejected by the relevant authorities.
- 18.3 IAR is responsible for the export of the Licensed Products from the original country of export to the Licensee country and entity as indicated on the Contract, and to provide the Licensee with relevant information regarding its Licensed Products. IAR does not assume any liability for import nor for any potential re-export or transfer of the Licensed Products from such Licensee country, to any other country. It is the responsibility of the Licensee to ensure that such re-export or transfer is legally permissible and meets the requirements of such Licensee country. Notwithstanding the foregoing, any re-export and/or further transfer of the Licensed Products shall be in compliance with the requirements and limitations of the relevant type of license purchased by the Licensee and the terms and conditions of this Agreement.

19. MISCELLANEOUS

- 19.1 This Agreement shall not in any situation be assignable or transferable in whole or in part by either party, without the prior written approval of the other party. This notwithstanding, IAR shall be entitled to assign this Agreement in whole or in part to a company within the IAR Group, and IAR may assign this Agreement without penalty or detriment to its rights under this Agreement, and without the Licensee's prior written consent, in the event of a merger or similar reorganization or sale of substantially all of IAR' assets.
- 19.2 As set out in this Agreement, IAR only provides the license on the terms and conditions presented by IAR in this Agreement. Any individual and/or general terms and conditions, including terms of purchase, presented by Licensee (for example in a purchaser order or Contract) or otherwise used or referenced

to by the Licensee shall be null and void, irrespective of whether IAR performs delivery without, in addition to this clear declaration, declaring that it has rejected to be bound by such terms and conditions. Consequently, IAR is not bound by any qualified or modified acceptance to its proposal or to this Agreement, unless IAR has clearly stated in writing that it accepts such qualified or modified acceptance.

- 19.3 No alteration or amendment to this Agreement shall be valid unless such alteration or amendment is made in writing and signed by the parties hereto.
- 19.4 All correspondence and notifications pursuant to this Agreement shall be in writing in English and shall be deemed to have been duly received (i) on the day of delivery, if delivered personally; (ii) on the next working-day in the place to which it is sent, if sent by email, provided that the recipient has confirmed receipt; (iii) on the second business day after sending, if sent by reputable overnight courier (with delivery receipt obtained); or (iv) on the fifth Business Day after sending, if sent by registered or certified mail, to the address or email address of the recipient set forth in the Invoice or Contract (or to such other address or email address of the recipient notified to the sender by the recipient for the purpose of this Agreement).
- 19.5 The Licensee acknowledges that this Agreement may be translated into different languages for convenience. Notwithstanding the foregoing, the English version of the Agreement and any constituent parts thereof, shall be the only legally binding version and shall prevail in the event of any discrepancies or conflicts between different versions.
- 19.6 This Agreement contains the entire understanding between the parties on its subject matter, and annuls and replaces any other agreements or understandings, whether written or oral, which may exist or have existed between the parties on the subject matter hereof.
- 19.7 This Agreement and any non-contractual obligations arising out of or in connection with it shall be governed by and construed in accordance with the laws of Sweden, excluding its conflict of laws principles providing for the application of the laws of any other jurisdiction.
- 19.8 Any dispute, controversy or claim arising out of, or in connection with, this Agreement, or the breach, termination, or invalidity thereof, or any non-contractual obligations arising out of or in connection with this Agreement, shall be finally settled by arbitration administered by the SCC Arbitration Institute (the "SCC"). The Rules for Expedited Arbitrations shall apply, unless the SCC in its discretion determines, taking into account the complexity of the case, the amount in dispute and other circumstances, that the Arbitration Rules shall apply. In the latter case, the SCC shall also decide whether the Arbitral Tribunal shall be composed of one or three arbitrators. The seat of arbitration shall be Stockholm, Sweden. The language to be used in the arbitral proceedings shall be English.
- 19.9 All arbitral proceedings conducted pursuant to this Section 19.8, all information disclosed and all documents submitted or issued by or on behalf of any of the disputing Parties or the arbitrators in any such proceedings as well as all decisions and awards made or declared in the course of any such proceedings shall be kept strictly confidential and may not be used for any other purpose than these proceedings or the enforcement of any such decision or award nor be disclosed to any third party without the prior written consent of the Party to which the information relates or, as regards to a decision or award, the prior written consent of all the other disputing Parties.

19.11 IAR may process personal data, as a controller, when providing the Licensed Product, the Service and/or in connection with the provision of Support and Update Services. IAR's processing of such personal data will be made in accordance with IAR's privacy policy, as may be amended from time to time, the current version to be found at <https://www.iar.com/privacy-policy/>. The Licensee undertakes to inform any users of the Licensed Product or the Service about IAR's personal data processing and to provide them with a copy of IAR's privacy policy.

2. SUPPORT AND UPDATE SERVICE

2.1 Restrictions and conditions

- 2.1.1 A Licensee using the latest release of a Licensed Product is entitled to Support under the terms and conditions set out herein. Notwithstanding the foregoing, IAR will provide Support for a release of the Licensed Product that has been publicly released by IAR during the last six (6) months.
- 2.1.2 Unless explicitly stated otherwise, IAR will not provide an Error Correction, if (i) the Licensee is requesting such for an older version of the Licensed Product other than the most recently issued, or (ii) the Error has been corrected in a later release.
- 2.1.3 IAR has no obligation to provide Support under the SLA for Licensed Product(s) that have been modified. Accordingly, if the Licensee has modified the Licensed Product, the Licensee may only report Errors that relate to the Unmodified Product. It is the responsibility of the Licensee to verify that any Error is reproducible in the Unmodified Product. All Error Corrections will be made in the Unmodified Product. MODIFYING THE PRODUCT CAN CONSTITUTE A BREACH OF THE LICENSE RIGHTS, AS GRANTED UNDER THE SLA. Furthermore, IAR has no obligation to provide Support under the SLA for Licensed Product(s) running on other host machine hardware or host operating systems than those explicitly stated at time of entering into the SLA for the corresponding Licensed Products, or as amended by a Service or Feature Release.

2.2 Scope of the Support Service

- 2.2.1 As part of the Support Services, the Licensee is granted access to the IAR Support Website. Through the IAR Support Website, the Licensee will also have access to certificates and Report on the Certificate for the Functional Safety Licensed Products.
- 2.2.2 Additionally, support Services include Technical Support, Error Investigation, Error Correction, and Update Service, as further described in this Section 2.2.
- 2.2.3 Technical Support: Technical Support is a help desk service which includes e-mail and telephone consultations during Working Day business hours. E-mail is the recommended communication mechanism for case tracking purposes. Technical Support is intended to answer questions about the use and operation of the Licensed Product in cases where the Documentation is incomplete or unclear, and will be provided to a reasonable extent. Technical Support may be provided in local language and

in local time zones, from IAR Distributors or IAR regional support offices where applicable. Technical Support does not include training and tutoring of the Licensee's staff; such training services might be offered separately to the Licensee by IAR.

- 2.2.4 Error Investigation: IAR investigates the reported problem, tries to reproduce the problem where applicable and feasible, and isolates the Error, if any. The Licensee's obligation in this respect is to provide sufficient and reasonable information about the suspected Error based on the instructions from IAR, in a timely manner and coherent form. If IAR concludes that the reported problem is an Error, IAR sends confirmation to Licensee together with the assigned Support Call Number. Support Services do not include analysis of the Licensee's applications or interoperability between the Licensed Product and other products or software.
- 2.2.5 Error Correction: The resolution of an Error could be an answer, a workaround or a correction of the Error. IAR does not normally supply an Error Correction in order to achieve only one specific Error Correction of the Licensed Product. Accordingly, Error Corrections of the Licensed Product may include additional Error Corrections that are not related to the reported Error. Furthermore, a correction of an Error will in most cases be made available to the Licensee only as part of a Service or Feature Release. Corrections of Errors are always made on the latest release.
- 2.2.6 Update Service: Service Releases and Feature Releases are made available from time to time by IAR. During the License Term, the Licensee is entitled to receive and use Service Releases and/or Feature Releases (as made available from time to time) relating to a Licensed Product. A Service Release or Feature Release will be considered officially launched once the Licensee is notified of its accessibility in writing or when such release is accessible on dedicated web platforms (such as the IAR "Mypages"), whichever occurs earlier.
- 2.3 Error reporting
- 2.3.1 What is here stated in Sections 2.3 to 2.5 prerequisites that all communication between the Licensee and IAR is in comprehensible written form in the English language, except when explicitly agreed otherwise. IAR will use reasonable efforts to minimize overhead from language translations between the Licensee, IAR Distributor, and IAR.
- 2.3.2 Prior to issuing an SPR, the Licensee shall undertake all relevant actions to consult the Documentation and support material such as release notes and technical notes that are available on the IAR Support Website.
- 2.3.3 In order to maximize the turn-around time efficiency it is essential that the Licensee provides IAR with an SPR that is as complete as possible. There shall only be one (1) reported Error per SPR.
- 2.3.4 Each SPR will be assigned a Support Call Number. The Licensee is encouraged to use the Support Call Number in all further contacts with IAR concerning a reported Error. Failure by Licensee to provide the Support Call Number in further contacts with IAR relating to an SPR will waive IAR's responsibility in terms of Response and Repair Times.
- 2.3.5 IAR will not be obligated to resolve the identified Error if the Licensee does not make all reasonable efforts to collaborate with IAR to resolve the identified Errors. This could mean providing access to Licensee-specific hardware and software. IAR is aware that under certain circumstances the Licensee may be prohibited to send adequate information (such as source code) to IAR as such information may be privileged. It is however the Licensee's responsibility to rewrite or restructure such information so that it becomes non-privileged, and furnish such information to IAR.

2.3.6 Each SPR shall as a minimum contain the following information:

- Licensee company name
- Licensee company division or project
- Submitter name and e-mail address, and name of Licensee Contact Person
- A Support Call Number if such has been given by IAR in earlier communication relating to the reported Error
- Description and logging of the Error and its impact on the Licensed Products performance
- A preliminary Error Severity Level for the general classification of the Error(s) in one of the four classes as defined in Section 2.6.1 below
- A description of the command(s) and procedures that reveal the Error(s)
- A description of the hardware and software environment
- Specification of release and version of the Licensed Product(s) in question
- A short description of the Errors
- Examples of input
- The resulting output
- The expected output
- The license number of the Licensed Product, if applicable
- Any special circumstances surrounding the discovery of the Error(s), and all material needed to reproduce the Error at IAR.

2.4 Response and Repair Time

2.4.1 Once IAR receives an SPR, IAR will use reasonable efforts to respond in accordance with the Response Time for the Error Severity Level of the Error as defined in the table in Section 2.5. In its response, IAR may, if applicable, indicate any disagreement with respect to the Licensee's proposed Severity Level as further defined under Section 2.6.1. In the case that IAR deems that the information provided in the SPR is insufficient for IAR to start investigating the Error, the response will include a statement to this fact.

2.4.2 IAR will use reasonable efforts to resolve the Error or reduce the Error Severity Level of the Error via a workaround or a correction of the Error in accordance with the Repair Time. However, there could be conditions when IAR will not be able to meet the defined Repair Times. Such conditions could include poor collaboration from the Licensee (as exemplified in Sections 2.1.3, 2.2.3, and 2.3), insufficient information in the SPR (as defined in Section 0), difficulties for IAR to reproduce the problem and other circumstances outside of IAR's control, or incur substantial costs to IAR not in proportion to fees paid for the Support and Update Service. The best effort approach here defined shall be interpreted as that IAR's ambition is to resolve or reduce a problem within the time frames given below in nine cases out of ten (90%). Notwithstanding the foregoing, IAR recognizes that Errors defined as Critical or Serious can impose a major inconvenience for the Licensee and IAR will therefore use its reasonable best efforts to provide a correction of the Error as soon as possible, irrespectively of the Repair Times defined herein.

2.5 Time frames

Severity Level	Response Time	Repair Time
Critical	1 Working Day	No more than 15 Working Days
Serious	1 Working Day	No more than 30 Working Days
Moderate	2 Working Days	At next scheduled Service or Feature Release (unless such scheduled release is planned within the next 45 Working Days), but not later than one (1) year.
Minor	2 Working Days	At IAR's discretion

2.6 Error Severity Levels

2.6.1 IAR uses the following four (4) Severity Levels to categorize reported Errors:

- a) Critical level: The Licensed Product(s) functionality is inoperable causing critical impact to business operations if functionality is not restored quickly. If the Error is occurring during the development phase of the Licensee's product, the Error hinders all of the Licensee's development, integration, or testing in such a critical way that development progress is halted. No viable workaround is known.
- b) Serious level: The Licensed Product(s) functionality operates with severely reduced capacity causing significant impact to business operations. If the Error is occurring during the development phase of the Licensee's product, the Error has serious impacts on the development, integration, or testing, OR several critical modules in the Licensed Product(s) are inoperable. A workaround may be available, but severely reduces the Licensee's productive use of the Licensed Product(s).
- c) Moderate level: The Licensed Product(s) functionality operates with moderate reduced capacity causing slight impact to business operations. If the Error is occurring during the development phase of the Licensee's product, the Error has minor impacts on the development, integration or testing, OR a single critical module in the Licensed Product(s) is inoperable.
- d) Minor level: The Licensed Product(s) functionality operates abnormally. If the Error is occurring during the development phase of the Licensee's product, the development, integration, or testing is inconvenienced, OR a single non-critical module in the Licensed Product(s) is inoperable. Alternately, the Licensee requires information or assistance with respect to Licensed Product(s) capabilities, installation, Documentation, or configuration.

2.6.2 The SPR should include the Licensee's advice on the Error Severity Level. Upon receiving the SPR, IAR will judge whether or not the proposed Severity Level corresponds to those defined in Section 2.6.1. In case IAR reasonably finds that the reported Error does not meet the proposed Severity Level, then IAR will contact the Licensee with information about the Error Severity Level assigned by IAR. If no Severity Level is advised by the Licensee, the Error will automatically be deemed to be Minor level.

3. LICENSEE CONTACT PERSON

3.1 The Contact Person shall be deemed authorized by the Licensee to make decisions on behalf of the Licensee with respect to all requests to IAR for Support. If a Licensee has Licensed Product(s) at more than one Site or is involved in more than one project, the Contact Person shall appoint additional Contact

Person(s) at each Site and/or for each project to receive and disseminate information received from IAR relevant to the Licensed Product(s) at such Site or for such project. If the Licensee does not clearly name a Contact Person, then IAR may assume that the person filing the original SPR is the authorized Contact Person.

- 3.2 As soon as a Contact Person is replaced, the Licensee shall notify IAR thereof in writing.
- 3.3 The Licensee's Contact Person shall ensure that the license number for the Licensed Product and other information that validates that the Licensee is entitled to receive Support from IAR is readily at hand, and shall present such information to IAR at first contact for each case, even if not solicited for such information.
